

SAVIOUR KWEKU DOGBEY

IT Systems & Full-Stack Developer

Ghana | saviour.k.dogbey92@gmail.com | +233 542 254 044 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Versatile IT & Software Engineering Professional with 3+ years of experience engineering secure web platforms, managing API architectures, and supporting critical IT infrastructure. Combines full-stack development expertise with a strong background in systems administration, network dashboard support, data integrity, and enterprise security standards.

CORE IT & TECHNICAL COMPETENCIES

IT SYSTEMS & ENTERPRISE SUPPORT • Systems Troubleshooting • Operational Support • IT Infrastructure Management • Environment & Configuration Management • Relational & NoSQL Databases (SQL, MongoDB)	APPLICATION & API SECURITY • RESTful API Integration • Authentication & Authorization Protocols • Secrets Management • Data Validation & Error Handling
SOFTWARE DEVELOPMENT • JavaScript (ES6+) • React • Next.js • Node.js • Express.js • TypeScript • HTML5/CSS3 • Tailwind CSS • Python • Bash Scripting	DEVOPS, WORKFLOWS & METHODOLOGIES • Version Control (Git/GitHub) • CI/CD Deployment Pipelines (Netlify, Vercel) • Agile/Scrum Development • Technical Documentation

PROFESSIONAL EXPERIENCE

Petaverse — IT Systems & Full-Stack Developer

Remote | 2023 – Present

- **Enterprise Application Development:** Engineer and maintain high-availability, responsive web applications using React.js, Next.js, and Tailwind CSS.
- **Secure API & Backend Architecture:** Design and integrate RESTful microservices powered by Node.js, Express, and MongoDB, enforcing secure authentication and data handling protocols.
- **System Optimization & Maintainability:** Architect modular, reusable components and client-side state workflows (RTK Query), reducing system latency and technical debt.
- **Deployment & DevOps:** Manage Git/GitHub version control workflows and automated Netlify/Vercel CI/CD deployment pipelines, ensuring zero-downtime updates.

Tizeti Network Limited — Software & IT Systems Developer

Remote | 2021 – 2023

- **Network Dashboard & Core Application Support:** Built and maintained operational dashboards and client interfaces supporting telecommunication and broadband infrastructure operations.
- **System Reliability & Optimization:** Integrated RESTful services and optimized backend database queries, improving real-time data processing and query execution speed.
- **Incident Management & Debugging:** Diagnosed and resolved complex runtime software faults across internal production systems, sustaining high operational availability and system reliability.

Freelance — Digital Solutions & Visual Identity Consultant

2020 – Present

- Designed UI/UX mockups, brand assets, and digital communication materials using Figma and Canva for enterprise and startup clients.

KEY IT & SOFTWARE PROJECTS

Sterling Oil Web Portal: Contributed to web platform enhancements, security-focused UI interfaces, and corporate digital assets for enterprise energy management. (stoilmgt.com)

Lantern Africa Platform: Engineered secure user onboarding workflows, access control interfaces, and multi-factor authentication modules. (playlanternafrica.com)

MyDialecta Platform: Developed full-stack web modules and database-driven features supporting real-time data handling and interactive user workflows. (mydialecta.com)

SheTalks Africa: Maintained secure client integration pipelines and web features supporting community-driven enterprise initiatives. (shetalksafrica.org)

EDUCATION & CERTIFICATIONS

- **Petaverse Software Bootcamp:** Full-Stack & Systems Engineering Certification (2023)
- **BeTechified Academy:** Product Management Certification (2023)
- **Wesley Grammar Senior High School:** Secondary Education Certificate (2010 – 2013)
