

CURRICULUM VITAE

SAVIOUR KWEKU DOGBEY

IT Systems & Full-Stack Developer

Ghana | saviour.k.dogbey92@gmail.com | +233 542 254 044 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Versatile Full-Stack Developer and IT Systems Engineer with 3+ years of experience building secure web platforms and leveraging digital marketing and brand strategy to support business growth.

CORE IT & TECHNICAL COMPETENCIES

IT SYSTEMS & ENTERPRISE SUPPORT - Systems Troubleshooting - Operational Support - IT Infrastructure Management - Environment & Configuration Management - Relational & NoSQL Databases (SQL, MongoDB)	APPLICATION & API SECURITY - RESTful API Integration - Authentication & Authorization Protocols - Secrets Management - Data Validation & Error Handling
SOFTWARE DEVELOPMENT - JavaScript (ES6+) - React, Next.js - Node.js, Express.js - TypeScript - HTML5/CSS3, Tailwind CSS - Python - Bash Scripting	DEVOPS, WORKFLOWS & METHODOLOGIES - Version Control (Git/GitHub) - CI/CD Deployment Pipelines (Netlify, Vercel) - Agile/Scrum Development - Technical Documentation

DIGITAL MARKETING & COMMUNICATIONS

Social Media Management, Digital Marketing Strategy, Content Planning, Brand Communication, Social Media Content Creation, Community Engagement, Digital Campaign Management, Visual Brand Development.

PROFESSIONAL EXPERIENCE

Petaverse — IT Systems & Full-Stack Developer

Remote | 2023 – Present

- Enterprise Application Development:** Engineer and maintain high-availability, responsive web applications using React.js, Next.js, and Tailwind CSS.
- Secure API & Backend Architecture:** Design and integrate RESTful microservices powered by Node.js, Express, and MongoDB, enforcing secure authentication and data-handling protocols.
- System Optimization & Maintainability:** Architect modular, reusable components and client-side state workflows using RTK Query, reducing system latency and technical debt.
- Deployment & DevOps:** Manage Git/GitHub version-control workflows and automated Netlify/Vercel CI/CD deployment pipelines, ensuring reliable production releases and continuous application availability.

Tizeti Network Limited — Software & IT Systems Developer

Remote | 2021 – 2023

- Network Dashboard & Core Application Support:** Built and maintained operational dashboards and client interfaces supporting telecommunications and broadband infrastructure operations.

- **System Reliability & Optimization:** Integrated RESTful services and optimized backend database queries, improving real-time data processing and query execution speed.
- **Incident Management & Debugging:** Diagnosed and resolved complex runtime software faults across internal production systems, sustaining high operational availability and system reliability.

Freelance — IT, Digital Marketing & Visual Identity Consultant

Remote | 2020 – Present

- Provide social media management and digital marketing services remotely to corporate organisations, including Awoson Logistics Company Ltd. and Dialecta, as well as individual businesses.
- Develop and execute social media content strategies designed to improve brand visibility, audience engagement, customer communication, and digital presence.
- Plan, create, and manage digital content for platforms including Facebook, Instagram, LinkedIn, and other business communication channels.
- Develop marketing campaigns, promotional materials, social media calendars, captions, and branded digital communication assets.
- Support businesses with brand positioning, visual identity, digital communication, and online customer engagement.
- Design UI/UX mockups, brand assets, social media creatives, and digital communication materials using Figma and Canva.
- Collaborate remotely with clients to translate business objectives into practical digital, marketing, and technology solutions.

KEY IT & SOFTWARE PROJECTS

Sterling Oil Web Portal: Contributed to web platform enhancements, security-focused UI interfaces, and corporate digital assets for enterprise energy management. (stoilmgt.com)

Lantern Africa Platform: Engineered secure user onboarding workflows, access-control interfaces, and multi-factor authentication modules. (playlanternafrica.com)

MyDialecta Platform: Developed full-stack web modules and database-driven features supporting real-time data handling and interactive user workflows. (mydialecta.com)

SheTalks Africa: Maintained secure client integration pipelines and web features supporting community-driven enterprise initiatives. (shetalksafrica.org)

EDUCATION & CERTIFICATIONS

Petaverse Software Bootcamp — Full-Stack & Systems Engineering Certification (2023)

BeTechified Academy — Product Management Certification (2023)

Wesley Grammar Senior High School — Secondary Education Certificate (2010 – 2013)
